Subject: "Final" tally per your request -

With the addition of the surveys from Kelley today - we are up to 64 home owners/renters that we have identified in some way.

21 residences (19 wells) from the CO&A removed from this count.

That leaves 43 locations:

of that we have 12 Unknowns (either summer homes, refused to fill out survey, phones disconnected or surveys dropped off and no contact) - of that I would suggest that we count 9 for possible sampling (2 folks work for Cabot in some capacity and are not interested).

We have 30 locations that have been sampled and only 1 that reports no sampling (on Carter Road) -

to be safe I would say a possible 41 more locations, though it seems that some people may be way out of the area and are not reporting any issue -

hope this is clear- I have a reboot that my computer is trying to do in 3 minutes so I have to sign off. I am having dinner with Bob H tonight but am reachable via BB.

see ya -
